# **Monthly Indicators**

**Activity for El Paso and Teller Counties Only** 

#### February 2017

Percent changes calculated using year-over-year comparisons.

New Listings were down 4.0 percent for single family-patio homes but increased 19.9 percent for townhouse-condo properties. Pending Sales increased 3.4 percent for single family-patio homes and 21.3 percent for townhouse-condo properties.

The Median Sales Price was up 5.2 percent to \$255,750 for single family-patio homes and 16.5 percent to \$180,000 for townhouse-condo properties. Days on Market decreased 33.3 percent for single family-patio homes and 40.0 percent for townhouse-condo properties.

Unemployment has reached pre-recession levels, and Americans remain optimistic about finding quality employment. This matters because job growth and higher paychecks fuel home purchases. Unfortunately, that won't matter for potential buyers if price appreciation outpaces income growth and if mortgage rates continue their upward trend. Sellers are getting a generous number of offers in this market. The worry for sellers then becomes that there will not be a generous number of homes to choose from when they become buyers.

#### **Activity Snapshot**

- 8.8% + 5.5% - 28.9%

One-Year Change in One-Year Change in Sold Listings Median Sales Price All Properties All Properties All Properties

Residential real estate activity in El Paso and Teller Counties, comprised of single-family properties and patio homes, townhomes and condominiums. Percent changes are calculated using rounded figures.

### **Sold Listings**

Actual sales that have closed in a given month.

### **Inventory of Active Listings**

A measure of the number of homes available for sale at a given time.

# **Glossary of Terms**

A research tool provided by the Colorado Association of REALTORS®

New Listings	A measure of how much new supply is coming onto the market from sellers.
Pending Sales	A count of all the listings that went into pending status during the reported period. Pending listings are counted at the end of the reported period. Each listing can only be counted one time. If a listing goes into Pending, out of Pending, then back into Pending all in one reported period, this listing would only be counted once. This metric includes Pending, Under Contract, Under Contract Short Sale and First Right of Refusal. This "leading indicator" of buyer demand measures signed contracts on sales rather than the actual closed sale.
Sold Listings	A measure of home sales that were closed to completion during the report period.
Median Sales Price	A measure of home values in a market area where 50% of activity was higher and 50% was lower than this price point.
Average Sales Price	A sum of all home sales prices divided by total number of sales.
Percent of List Price Received	A mathematical calculation of the percent difference from last list price and sold price for those listings sold in the reported period.
Days on Market Until Sale	A measure of how long it takes homes to sell, on average.
Housing Affordability Index	A measure of how affordable a region's housing is to its consumers. A higher number means greater affordability. The index is based on interest rates, median sales price and average income by county.
Inventory of Active Listings	A measure of the number of homes available for sale at a given time. The availability of homes for sale has a big effect on supply-demand dynamics and home prices.
Months Supply of Inventory	A measure of how balanced the market is between buyers and sellers. It is expressed as the number of months it would hypothetically take to sell through all the available homes for sale, given current levels of home sales. A balanced market ranges from 4 to 7 months of supply. A buyer's market has a higher number, reflecting fewer buyers relative to homes for sale. A seller's market has a lower number, reflecting more buyers relative to homes for sale.
